Bangladesh Election Commission Election Commission Secretariat Identification System for Enhancing Access to Services (IDEA) Project (2nd Phase)

Nirbachan Bhaban (8th Floor) Agargaon, Dhaka-1207

Terms of Reference (ToR)
for
Software Consultant (Java Stack)
for IDEA Project (Phase 2)

Package No: PS-10.2

Terms of Reference (TOR)

of

Software Consultant (Java Stack)

Package No: PS-10.2

Background:

Bangladesh Election Commission (BEC) is responsible for registering all citizens eligible to vote and for conducting open and independent elections in the country according to the Constitution. In addition, BEC has recently been made responsible by the Government of the People's Republic of Bangladesh (GoB) for issuing a unique secure identity card to citizens and for administrating all related activities, including the maintenance of a national citizen identification database and delivery of identity verification services to qualified public and private organizations. The BEC has established a National Identity Wing (NIDW) to administer this national identity system (NIDS). This system is expected to be a strategic national resource to facilitate delivery of public and private services to their intended beneficiaries.

Responsibilities:

- Understand, maintain and enhance existing web-based J2EE applications using spring boot framework.
- Design and implement scalable, high-performance software solutions.
- Integrate application with databases such as Postgres, kudu.
- Implement real-time data streaming using Apache Kafka.
- Develop and optimize search functionality using Elastic search.
- Integrate with MinIO for cloud-native object storage.
- Integration with Redis for caching, session storage, and improving application performance.
- Write and maintain RESTful APIs and ensure seamless integration with front-end and thirdparty services.
- Implement authentication and security best practices (OAuth2, JWT, LDAP, SAML).
- Work with Git repositories for version control and collaboration.
- Optimize application performance, security, and reliability.
- Monitor, debug and troubleshoot applications.
- Collaborate with cross-functional teams to integrate front-end and back-end components.
- Collaborate with DevOps teams to streamline CI/CD pipelines.
- Ensure compliance with industry best practices and security standards.
- Provide technical guidance and mentorship to development teams.

Qualifications:

- Bachelor's or Master's degree in Computer Science and Engineering, Software Engineering, or a related field.
- At least 10 (ten) years proven experience in developing and maintaining web-based J2EE applications.
- Strong understanding of Java Enterprise Edition (J2EE) technologies, including Servlets, JSP, EJB, and JSF.
- Experience with Spring framework (Spring Boot, Spring MVC, Spring Security) and Hibernate/JPA.
- Experience developing RESTful APIs and working with SOAP-based web services.
- Strong knowledge of SQL and relational databases like PostgreSQL, MySQL, or Oracle, kudu along with ORM frameworks like Hibernate.
- Strong knowledge on message broker like Apache Kafka, Vernmq.
- Familiarity with authentication protocols (OAuth2, JWT, LDAP, SAML) and enterprise security best practices.
- Experience working with Apache Kafka for event-driven architecture and real-time data processing.
- Knowledge of MinIO for scalable object storage solutions.
- Hands-on experience with Elasticsearch for full-text search and analytics.
- Experience of utilizing Redis for caching, session storage, and improving application performance.
- Experience with build tools such as Maven/Gradle
- Proficiency in working with Git repositories for version control.
- Experience with relational databases such as PostgreSQL, MySQL, or Oracle.
- Experience of frontend framework like React.js, Express.js or AngularJS is a plus.
- Knowledge of microservices architecture, containerization (Docker), and CI/CD pipelines is a plus.
- Understanding of security best practices for enterprise applications.
- Strong focus on code quality, testing, and best practices.
- Understanding of enterprise software design patterns.
- Strong analytical skills to troubleshoot and optimize enterprise applications.
- Ability to work in cross-functional teams and communicate effectively with stakeholders.
- Willingness to learn new technologies and adapt to changing project requirements.

Deliverables:

The nominated consultant has to submit an inception report to the Procuring Entity (PE) within seven (7) days of appointment, outlining the proposed plan of action. The consultant is also required to submit a monthly activity plan, at the end of each month, a performance report showing what has been done. This report may include any challenges faced, difficulties encountered, and suggestions for overcoming barriers to achieving the objective or goal. Finally, the consultant must submit a comprehensive report of the overall performance and outcomes of the activities conducted.

Duration of the Consultancy:

The consultancy will be up to project period (30 November 2025), starting from the date of contract signing. However, the duration of the contract may be increased or decreased depending on the performance of the consultant, project's needs, budget and extension of project time period.
